EXAMINER

FLEMING, FAYE M

ART UNIT PAPER NUMBER

3616

DATE MAILED: 03/08/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/791,711	SAUER, FRANK	
	Examiner	Art Unit	
	Faye M. Fleming	3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-22 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☒ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 13-14, 16 and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikawa (JP405139231A).

Ishikawa teaches a decorative element 14 for an airbag module cover including predetermined breaking points and/or bending points 13A. Predetermined breaking points and bending points are provided in the region of tear-open edges of the cover cap and are provided outside the region of the tear-open edges of the cover cap. Material weakenings are provided in the decorative element at the predetermined breaking points. Grooves 21b are provided as material weakenings. The material weakenings are provided on the rear side the decorative element. Perforations are provided in the region of the predetermined breaking points. The perforations extend from a rear side of the decorative element to just below a top side of the decorative element. The perforations are continuous. The decorative element comprises a softer carrier material; and a harder covering layer; and wherein a material weakening is provided in the covering layer. The rear side of the covering layer includes the material weakening; and wherein the carrier material engages into the material weakening. The decorative element comprises airbag cap material. The decorative element is configured to break at the predetermined breaking points when the airbag deployed. Approximately one fourth of the decorative element remains at the sections when the decorative element

Art Unit: 3616

tears. Approximately one half to one eighth of the decorative element remains at the sections when the decorative element tears.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishikawa (JP405139231A) in view of Schneider, et al. (20030178819).

Ishikawa teaches the claimed invention except for continuous perforations formed by lasers, ultrasonic and/or cutting. Schneider teaches an airbag cover comprising perforations which can be formed by lasers, ultrasonic and/or mechanical (i.e. cutting). Based on the teachings of Schneider, it would have been obvious to one having ordinary skill in the art at the time the invention was made have the perforations of Ishikawa formed by lasers, ultrasonic and/or cutting to provide method of perforating the airbag.

5. Claims 15 and 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishikawa (JP405139231A).

Ishikawa teaches the claimed invention except for the decorative element comprises flexible plastic, the decorative element provided with a metal layer applied by sputtering, a surface of the decorative element provided with an electroplated coating and a surface of the decorative element being lacquered.

With respect to claims 15 and 17-19, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the decorative element to be made of a plastic and/or a

Art Unit: 3616

metal and to have it lacquered and/or coated, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

With respect the metal layer be applied by sputtering, the method of forming the device is not germane to the issue of patentability of the device itself.

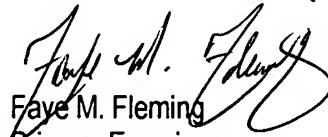

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye M. Fleming whose telephone number is (571) 272-6672. The examiner can normally be reached on M-F (9:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (571) 272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
